

You are here.

So are we.

**PatientsLikeMe** is an online community where you can **track** your own health journey, **connect** with others and **share** real-world data that can change medicine for the better. **You don't have to go it alone.**

Let's get started.

patientslikeme®  
[www.patientslikeme.com/ACCF](http://www.patientslikeme.com/ACCF)

## Connect

**Connect** with others who know just what you're going through. Make one-on-one connections or join the community forums to talk directly with others who are asking questions, offering insights, and providing support.

400,000+ members

## Track

**Chart** your health journey over time by tracking your symptoms, treatments, side effects and outcomes. The more you share, the more you and others like you can learn from your condition.

2,500+ conditions

## Learn

**Learn** from symptom and treatment reports that capture what it's like for people like you living with and treating their conditions. Compare your experiences to better understand your health journey.

70+ peer reviewed research publications

## 31 million

health data points from people living with diabetes, fibromyalgia, multiple sclerosis, depression, cancer, rare diseases and more.

## Share

When you **share** your data on PatientsLikeMe, you'll learn more about your own health, open the door to new insights for others like you and advance research for everyone.

## Join

It's free!

**Why your journey starts here**

Your healthcare provider has an affiliation with the American College of Cardiology Foundation (ACCF) and they've teamed up with AstraZeneca to help more people take control of their health. The ultimate goal? Pointing patients to a resource that empowers them to better understand their condition, connect with others like them and potentially reach better health outcomes. That's where PatientsLikeMe comes in. By sharing your experiences and tracking your health on PatientsLikeMe, you'll learn more about your own condition, others can learn from your experience, and researchers like our partners at the ACCF can get answers to the big questions.

Take your next step.
