

AMERICAN COLLEGE of CARDIOLOGY®

New eReports Health Systems Dashboard User Guide

NCDR® eReports Health Systems Dashboard

The mission of the NCDR[®] is to improve the quality of cardiovascular patient care by providing information, knowledge, and tools; implementing quality initiatives; and supporting research that improves patient care and outcomes.

1. CDM Overview

1.1. Common Data Model (CDM) for NCDR

The National Cardiovascular Data Registry (NCDR[®]) is an American College of Cardiology (ACC) suite of registries and is arguably the foremost set of cardiovascular registries with over 60 million records in 11 programs. With this, the NCDR has become a key source of clinical data to assess quality and outcomes for cardiologists and cardiovascular sections of healthcare systems and allows cardiologists to lead in evidence-based quality measures.¹

The genesis of the CDM for NCDR at ACC, was an idea to nurture a better organized and clinically driven

NCDR Common Data Model

•••

CDM enables all information delivery, advanced analysis and collaboration; with agility, data quality measurement and faster delivery, that aligns with NCDR® standards.

The NCDR Common Data Model is based on the Observation Medical Outcomes Partnership (OMOP)like Common Data Model.

culture for exceptional patient care. The new CDM methodology is distinctly different from the Legacy DW (Data Warehouse) and has been implemented for the Clinical, Information Technology, and Analytical Frameworks. It includes the implementation of an adaptive Data Warehouse Platform to allow users to report on a variety of clinical metrics from various Registries in a structured manner to support clinical analytic use.

With CDM we can help put the patients first, because now there is clear, better organized data.

1.2. Compatibility with external standards

The Enterprise Data Warehouse (EDW) designs and stores data within CDM to support analysis and reporting by implementing design principles like stability of purpose and quick turnaround.

The CDM includes data elements from the NCDR registries for inpatient and outpatient cases. The information in the data warehouse supports the informatics platform for NCDR.

¹ The source of this information is the (ACCF Internal) NCDR Informatics Document

1.3. Shortened development cycle, easier to incorporate Registry Version changes In addition to newly structured data, the CDM allows for a new Registry or an existing Registry's version changes to be incorporated in a shorter timeframe as compared to the previous data warehouse structure. The shortened development lifecycle is achieved with Single Standardized Data Intake Process, Registry-specific adapters for transformation, and Standardized Vocabulary and Content Structure, that gets arranged in fewer tables and columns. From the Analytics perspective, a Single Standardized Export Program (Format) and Single Standardized Aggregation Process (Metrics) has been implemented.

1.4 PowerBI Interface

NCDR has upgraded the dashboard interface from Cognos to PowerBI. The decision to make PowerBI the new data visualization platform aligns with NCDR's goals to support health systems in improving their hospitals performance and quality of care through real time data, and high-level insights.

2. Introduction to the eReports Health Systems Dashboard

NCDReReports Health Systems Dashboard is designed to support hospitals, health systems, private health insurance payers, and other stakeholders who value a multi-hospital view into quality of cardiovascular care being provided within a specific system or region.

A web-enabled business intelligence data report dashboard and quality improvement program, the NCDR® eReports Health Systems Dashboard is designed to serve as an enhanced customizable reporting mechanism by which clients can tailor NCDR® reports for comparison purposes, monitor the quality of data submissions from the hospital and perform comparative analyses by utilizing customized markets.

This user help guide will familiarize you with the eReports Health Systems Dashboard and assist you in using this tool to better improve the quality of cardiovascular care for your patients. Below are the definitions and types of user privileges that will help you work

through this guide. Thanks for your interest in the American College of Cardiology's $\mathsf{NCDR}^{\textcircled{R}}$

eReports Health Systems Dashboard.

2.1. Definitions

Client: This is an entity external to the American College of Cardiology Foundation (ACCF) who has a contract in place that will allow them to access the reports published on www.ncdr.com

Participant: This is a legal entity with a physical location that has a valid master agreement and registry specific addendum in place. In addition, all fees are paid and current and the participant offers a service that would meet inclusion for participation.

Bookmarked Metrics: These are the metrics your organization decides to bookmark because they will be most referenced.

My Markets: These are groups of facilities that are user-defined based on the hospitals participating in their program

2.2. User Privileges

eReports – Admin: Users with this privilege have the option to change preferences for

'My Metrics' and 'My Markets' for that institution.

eReports: Users with this privilege have the option to view the reports for that institution.

Corporate Profile - View: Users with this privilege have the option

to see the Corporate Profile of the institution.

Corporate Profile – Update: Users with this privilege have the option to update that

institution's corporate profile.

Corporate Site User Administration: Users with this privilege have the option to add new users and change user account information including which users have what privileges for that institution.

3. Registry Login

3.1. On-boarding

To access the NCDR eReports Health Systems Dashboard, the client must complete the on- boarding process. Upon receiving the counter executed agreement, the client relationship advisor will send you a welcome email which will include the counter executed agreement, Appendix B which has a list of participants and registries covered under the Corporate Level Master Agreement, and the client contact form which is needed to set up the eReports dashboard. Once the client contact form is completed by the client and remitted back to ACC, the client relationship advisor will set up an implementation call to walk through the onboarding process as well as provide a deep dive of the eReports dashboard. The "Super User" noted as the primary contact in the client contact form, will receive log-in credentials via email after the implementation call has been completed. The email will confirm account activation and will provide a Participant ID, username and a temporary password associated with the account.

Login:

To access a registry and/or the Health Systems Dashboard, go to <u>www.NCDR.com</u>. Click the

Registry Participant Login button in the lower left-hand corner of the web page.

Note: If a user has not yet been associated with an account, they should first contact their Corporate Site Administrator (see Administration -> Corporate User Administration below):

Type <u>www.NCDR.com</u> in the web browser.

specific resources, and a navigational panel located on the left-hand side for setting up users and accessing the health systems dashboard.

4. Administration

The Administration menu options may include Individual Profile, Corporate Profile, and Corporate User Administration depending on the User's access level.

4.1 Individual Profile: This link allows each user to update their Individual Profile information. The Individual Profile contains demographic information about each individual user including name, street address, email address, phone number, password, etc. This information should be kept up to date so the institution's site manager and ACC staff can contact each site user. Additionally, each user can see the functions on the website for which they have privileges. This is located on the bottom of the page and is adjustable by the appropriate administrators on the Corporate User Administration page.

Change Password		
Change Password		
Note: If you do not know your remporary/current reassword, piedse click realidipant Login on tins page. Next, click the Forgot Password link found under the Logon button and submit the requested information.		
Change Password	Create a Secure & Valid Password	
Temporary/Current Password:	Each password must be at least 6 characters long and contain at least one lower case letter, one upper case letter and a number. Here are some helpful examples:	
New Password:	 Invalid password - "checkup" – Note that there are only 7 characters and it is also missing an upper case letter and number as well. Valid nassword - "Checkup" - This meets the minimum renuirements 	
Confirm New Password:	 Stronger password – "ChecUp214" – The combination of letters, special character and numbers create a strong/secure password. 	
	Note: You may use numbers (0,1,2,3 etc) and special characters including {,],], (,),<>,::,??,/,]:,~?.(@,#,5%,^&,*,+,=

On the Individual Profile page under the administration tab, a user can change the password by clicking the **Change Password** button under the Username. Enter the temporary/current password and the new password and click submit to save new password.

Change Contact Information

A user can update their contact information including their email, from the Individual Profile page under the Administration tab. Editable individual profile information

includes the user's name, organizational role, contact information and address.

- 4.1 Corporate User Administration: (Corporate Site User Administrators only) This link allows those with Corporate Site User Administration privileges to access the list of users for that system's accounts. In Corporate User Administration, those with Corporate Site User Administration privileges may add, edit, or disable users as well as grant privileges for viewing eReports and updating the Corporate Profile.
- 4.2.1.1 Search User: A user with Corporate Site User Administrator privileges can search for each user that belongs to their account by first name, last name, username, or email address to look up what privileges that user has.

4.2.2 Add User: For each specific Registry, the User Administrator can add a new user by clicking on the Add New User button at the bottom of the Corporate User Administration page. This will navigate the administrator to the Corporate User Setup page where they need to fill out all the required fields and assign roles and privilege(s) to the new user. Once

administrator clicks Save an automated email is sent to the email address provided for the new user for activation. The user must then follow the steps outlined above to complete activation of the user account.

4.2.3 Edit User: The User Administrator can change the privileges of the users from the Corporate User Administration page by clicking on the Edit link next to each user. The administrator is taken to the Corporate Site User Administration – User Setup page for that user where they can then change the username, registry access setting, contact information, role(s), privilege(s), or reset the user's password. New temporary passwords are sent to the user's email address. The administrator must click Save at the bottom of the page to keep the changes that are made.

Congratulations! You are now set up and ready to use the eReports Health Systems Dashboard. We are thrilled that you have joined our community of users of the NCDR® eReports Health Systems Dashboard. Learn more about the Health Systems Dashboard in the next section.

4.3 Corporate Profile: (requires the appropriate user privilege) This link allows the user to maintain vital information about the subscribing institution required for participation in the NCDR®. The Corporate Profile should be completed by the Corporate Site User Administrator after initially logging into the site. At a minimum, a user with "Corporate Profile – Update" privileges will be required to update the Corporate Profile on an annual basis.

Users with "Corporate Profile – Update" privileges should also update the Corporate Profile as information about the institution changes throughout the year.

The Corporate Profile page begins with a reference box that contains the systems Corporate ID and Encryption Key. Additionally, the user will see three sections including a Corporate Info section with further reference data including the Participant Name and Contract Start date. Below the Corporate Info Section find the Hospital(s) Information and Contact Information sections where users with the necessary privileges can update the account profile.

4.3.1 Hospital(s) Information: Those granted Corporate Profile editing privileges should keep the Corporate Profile information updated as the institution changes the number of hospitals that perform various cardiology procedures including PCIs, Diagnostic Catheterizations, Transcatheter Aortic Valve Replacements/Implantations, Pediatric Interventional Cardiac Catheterization, and vascular surgery as well as maintaining the number of hospitals with Electrophysiology Programs and Emergency Departments relative to the number of unique hospitals in the institution.

4.3.2 Contact Information: The contact information can also be updated for each user in the participating institution by clicking on the Update link next to each of the User roles listed.

CathPCI Registry / Administration	
Home Home Start Here	Administration Home Page
Administration Reports	The Administration tab allows participants to perform a number of administrative and/or maintenance functions related to the registry. The Registry Site Manager (RSM) upholds the role and responsibility for ensuring all registry users retain individual user ID's, login credentials, and have appropriate privileges and permissions to the registry.
	Individual Profile This be allows each user to update his Individual Profile information. The Individual Profile contains demographic information about the each registry user including name, street address, enail address, phone number, password, etc. In addition, it allows each user to set preferences for getting - main conflications for major events such as release of benchmark reports, device table changes, etc. The Individual Profile must be completed for each user immediately after initially logging into the site. This information must be kept up-to-date so the institution's Registry Site Manager (ISSM) and NCDR staff can sustain uninterrupted communication.
Health Systems Dashboard (Beta)	Access to the Profile regards appropriate privilege assigned by the Registry Site Manager (FSM). This tab allows users with "Update Site Profile" privilege to maintain vital information about the institution that is contractually required for participation in the registry. The Site Profile must be completed by the FSM what initially logging to the site. At a minimum, the RSM is required to update the Site Profile on an annual basis. The RSM must also update the Site Profile as information about the institution changes throughout the year. The Site Profile must be completed before semitimized dua to the MCR [®] .
Data Resources	Site User Administration Access to Site User Administration requires appropriate privilege assigned by the Registry Site Manager (RSM). This tab allows users with Site User Administration privilege to grant or revole access to the registry and assign the appropriate user privileges. Site User Administration allows adding eithing outfiles and use and use a control privilege to grant or revole access to the registry and assign the appropriate user privileges. Site User Administration allows adding eithing outfiles and use and use a control privilege to grant or revole access to the registry and assign the appropriate user privileges. Site User Administration allows adding eithing outfiles and use and us
Control	Operator Administration Access to Operator Administration requires appropriate privilege assigned by the Registry Site Manager (RSM). This link allows users with Operator Administration privilege to add and modify operators for their organizations. This section includes basic information such as name and physician NP number. Operator Information should be entered prior to entering patient records using the online Data Cellection Tool. Additionally, inits atta should be checked for accuracy prior to submitting quarterly records, and any time physician specifics have changed. To access or Operator Administration in the QuePCP Represent/ section celler device/ housing cutar-Administration.

Hamburger Menu:

Locate the "hamburger menu" of three parallel lines at the upper left corner of your screen.

- Additional Reports:
 - <u>Technical Specifications</u> provides information on the technical elements included in the Executive Summary and Facility Demographics Reports. This is a registry-specific report.
- How To
 - _- instructional video on how to setup My Markets
 - _- instructional video on how to Add a New User

- Files and Downloads
 - provides the latest development changes in the dashboard.
- Set Preferences
 - allows eReports Administrators to set the Markets that are shown in the My Markets tab.

eReports Health System - Navigation

Slicer Menu:

Users can click on the funnel or filter icon to open the Slicer Menu.

- <u>Ending Timeframe</u>: Use the dropdown arrow to select the desired Ending Timeframe. The four quarters comprising the organization's metric value is determined by the <u>last quarter</u> displayed in the Ending Timeframe window.
- <u>Benchmark:</u> Users can select which of the available percentiles they would like to compare their data to.
- <u>Inclusion</u>: Select whether to only display data that was Green in all 4 Quarters or All Hospital data.

Bookmarks

- Users are able to bookmark unlimited data views by selecting the Bookmark icon on the left side panel.
 - Add: Click on the Add button to Name or Label each data view set a Bookmark.
 - Create unlimited Bookmarks and label each with its own name.
 - **Delete**: Click on the 3 dots next to the Bookmark to Delete
- Return to the bookmark icon in a later session to retrieve any bookmarked view.

eReports Health System – Features

Toggles:

- 1. Some data windows on the dashboard offer toggles or buttons to change the view within the window.
 - Click on each toggle or button to alternate between different data views.
- 2. Users can switch between Facility and Market level view.

Focus Mode:

- When hovering the mouse over the upper right area of the data window, a small icon will appear labeled as "Focus Mode".
- Clicking on this icon will open the data in that specific window into an enlarged view.
- To exit focus mode, click "Back to Report" in the upper left corner.

6. eReports Health System Dashboard Pages

Navigate to the pages in this section via the horizontal bar at the top of the screen.

6.1 eReports Health Systems – Metric Summary

For the Heath Systems Dashboard, the landing page is the Metric Summary page. This view provides an overview of facilities' performance for each metric category. Users can click into a hospital to view performance at a glance or click into a value to view a breakdown of which metrics fall under each percentile group. Additionally, users can view data for metrics at a high level – using the heat map feature and the percentiles and trend graph visual.

6.2 eReports Health System – Metric Detail

The metric detail page provides the option to view the metric data for the previous four quarters and the current quarter value. This page also provides a heat map for the R4Q value, the 50th percentile which is also the national benchmark, and a breakdown of the four-quarter data. The table below the trend graph will provide the 25th, 50th (national benchmark), 75th and 90th percentiles for the metric.

6.3 eReports Health Systems – Market Analysis

The market analysis page provides the executive summary metrics. The market analysis allows participants to compare institutions and markets relative to all U.S. hospitals based on the markets set up by eReports Corporate Administrators from My Markets preferences.

Select Parameters: Users can utilize the metric category drop down menu to view metrics for a certain category, for example "Outcome Metrics."

Users can use the hamburger menu to find and select "My Markets". This is where users will be able to create their market. A market can be an individual hospital, or a group of hospitals. Markets can be edited anytime by the user.

6.4 Facility Comparison

Facility comparison provides an overview of how the health system is performing compared to the national benchmark, as well as how each facility is performing against each other.

Use the Metric drop-down menu to select the data of interest. Note: for some metrics, including those supported by a risk model, it is necessary to use the down arrow to expand the list to view the elements of the metric before selecting one that will produce the desired value. For example, to view the R4Q rate for a list of facilities on the metric "Risk Standardized Bleeding (all patients)" you will click on the down arrow next to the metric "Risk Standardized Bleeding (all patients)" and locate the applicable metric key, which is "4934 – Risk Standardized Bleeding (all patients)."

Hovering over each line in the Metric drop-down will display the full name if it is not visible in the menu window.

6.5 Follow up Detail

This page provides the follow up detail lines. Detail Line metrics will display quarterly data for the 4 quarters defined by the Ending Timeframe and the sum of this data

•••

is displayed in the My Group R4Q column. R4Q data can be evaluated against the Health System and the national benchmarks.

6.6 Data Quality Report (DQR)

The data quality report (DRQ) page provides an overview of the submission status for all facilities for each quarter. This page also provides the submission status for each facility for each quarter. Users can utilize the toggle features at the top of the page to view the submission status for base and follow-up metrics. Additionally, users can toggle between viewing the submission status for the most recent submission and the R4Q published submissions.
